

# ACCESSORIES & MOTORINGEAR MINI DEALER BULLETIN

## SUBJECT: REAR FOG LIGHT RETROFIT

Aftersales is pleased to announce the release of the retrofit kit for the rear fog light for all MINI Cooper, Cooper S and Convertible, produced after 10/14/04 (VIN TH50468 order # 9265268).

These cars are already pre-wired with the wiring harness for the rear fog lights from the switch pack in the center console to the rear bumper. To retrofit the rear fog light, a new switch pack needs to be installed. The plug for the rear fog light is right behind the black cover in the rear bumper. If the fog light is installed on an older car, the connectors might be corroded, as the plug is not protected against water until it is connected to the fog light. In this case, please replace the terminals and the connector housing.

After the installation, the vehicle needs to be coded (BC1/ZKE) via DIS plus or GT1 (CD39 or higher).

The Rear Fog Light is illegal in the State of Oregon. Please observe all state and local laws regarding the use of Rear Fog Lights.

Suggested installation time: 0.5 hrs

Printed on Recycled Paper

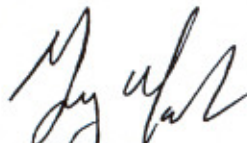

**Parts Information:**

<b>ITEM</b>	<b>PART NUMBER</b>	<b>M.S.R.P.</b>
Switch Pack For cars w/o front fog lights	61 31 6 917 983	\$ 75.00
