MINI Canada

2008 Product Planning Bulletin

Subject: MY09 MINI John Cooper Works and MINI John Cooper Works Clubman

MINI Canada is pleased to provide preliminary ordering information for MINI John Cooper Works and MINI John Cooper Works Clubman. The John Cooper Works (JCW) brand represents the performance platform within the MINI group. It combines an iconic brand with a rich racing heritage, performance engineering, and an increased level of driving excitement. The JCW brand is for the driving enthusiast and represents extreme performance and driving fun, with an unconventional attitude. It is based on the combination of the John Cooper story, premium performance, engineering and the essence of MINI.

With a newly developed turbo charged engine, exclusive 17" John Cooper Works Cross Spoke Challenge wheel, new sport double exhaust system with 85mm tips, and 4 piston front brake callipers the John Cooper Works models cater to the driving enthusiast.

For the first time the technically advanced control system, Dynamic Traction Control (DTC), has been used on a MINI. DTC allows more slip for greater driving excitement. Electronic Differential Lock Control (EDLC) is also new on the JCW models. EDLC ensures power gets to the wheel with the most grip. The faster responding and more flexible electronic system utilizes the braking system to maximize traction. Dynamic Stability Control (DSC), DTC and EDLC are standard on all John Cooper Works models.

STANDARD EQUIPMENT:

Engine/Transmission:

	MINI JOHN COOPER WORKS	MINI JOHN COOPER WORKS CLUBMAN
POWER	208 HP @6,000 RPM	208 HP @ 6,000 RPM
TORQUE	192 LB/FT @ 1,850 RPM	192 LB/FT @ 1,850 RPM
TORQUE OVERBOOST	207 LB/FT @ 2,000 RPM	207 LB/FT @ 2,000 RPM
TOP SPEED	236 KM/H	236 KM/H
0-100 KM/H	6.5 seconds	6.8 seconds

POWER TRAIN	CHANGES	BENEFITS
Pistons, Cylinder head, Cylinder head gasket	Strengthened	Higher boost pressure, torque & power
Air filter	Increased volume	Power increase
Air-intake passage	Optimized air flow	Power increase
Exhaust manifold	Material refinement and enhanced sealing	Power increase without higher fuel consumption
Turbocharger	Material refinement and pressure loss reduction	Power increase
Catalytic converter	Pressure loss reduction	Easy flow off
Exhaust system	Reduced damping	Sporty sound, enhances driving experience
Clutch	Enhanced clamping force	Increased engine power
